

Ad Occupational Lens

Design Feature

- Ad Occupational designs are the perfect visual experience for all kinds of indoor work.
- Ad Occupational lens is characterized by enhanced field of vision in the near and intermediate zones, especially performs well when viewing objects at medium distances.
- Comes with a variable corridor length enabling tailor made solutions for the individual customer needs.

Most Suitable Wearers

- People who perform relatively small and diverse activities indoors
- Myopia or farsighted to presbyopia people.
- Experienced progressive wearers who are looking for superior clear vision while working.
